

Hexa Wireless Beam Detector:

The wireless Photoelectric beam is a high technology product,. The product could be applied in all kinds of important places need to be protected such as institution, school, villa, factory, etc, installing in fence, door, window, and balcony.

Features:

Excellent performance: CPU intelligent control, advanced technology

High sensitivity: the alarm distance can be adjustable among 3 classes. Very sensitive, indoor/ outdoor use

Anti-interference: imported lense, auto temperature compensation

Beautifully and reliably constructed: mainly made from aluminum alloy of high quality, and the surface undergoes spraying process, durable.

Low false alarm: immune little pets

Wired/wireless, multi-beams, multi-heights optional

Easy to install

Beams number	2	3	4	6	8	10
	beams	beams	Beams	beams	beams	beams
Valid length (cm)	28	45	63	116	158	200
Whole length (cm)	36	53	71	124	166	208
weight(kg)	0.48	0.58	0.68	1.08	1.58	1.98
Max Transmitter	≤90	≤160	≤60	≤175	≤175	≤185
Standby Current (mA)						
Receiver	≤70	≤70	≤70	≤70	≤70	≤70
	10	10	10	10	10	10
Protection distance(m)	20	20	20	20	20	20
	30	30	30	30	30	30
	40	40	40	40	40	40
Power supply	DC12-18V					
Alarm output	Wireless and wired available					
Relay contact capability	3A/125VAC/DC 5V0.2W					
Trigger time	40ms					
Respond speed	≥1.5sec					
Optical axis adjusting angle
